1995 ELK HUNTING AND HARVEST REPORT

MAY 21, 1996

PREFACE

1995 ELK HUNTING AND HARVEST REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS	The number of hunters who hunted one or more days
HUNTER DAYS	Sum of whole days or portions of days hunted
PERCENT SUCCESS	The number of successful hunters divided by the total number of hunters and multiplied by 100
LOWER	Lower confidence limit at a level of confidence of 80 percent
POINT	The estimated value
UPPER	Upper confidence limit at a level of confidence of 80 percent
GEN ELK	An abbreviation for general elk license
GEN B10	An abbreviation for general elk license included in the nonresident B10 combination license
SP	An abbreviation for special permit
OTHER	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.
UNKWN	A symbol for unknown used to designate unknown sex

Explanations

The elk hunting and harvest statistics are estimates made from the sample of 59,058 questionnaires representing about 43 percent of all 138,374 elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

The analysis and report program was extensively modified prior to the 1994 license year analysis to more accurately estimate and report special elk permit holders who hunted and/or harvested elk in hunting

(CONTINUED)

districts where their permit was not valid. These estimates are included in the "OTHER" categories for resident and nonresident for each hunting district. All licenses and permits which are valid in a particular hunting district are listed with the district and represent all hunting and harvest estimates for those license or permit holders that occurred within the district. The "OTHER" category gives all hunting and harvest activity that occurred in the hunting district by special permit holders whose permits were not valid in the district but may have hunted using their general elk license. It is important to keep in mind that the "GEN ELK" or "GEN B10" categories apply to those individual hunters who possessed only a general elk license and no special elk permit. This rationale is the same as used in previous years, except that hunting and harvest activity for special permit holders occurring where their special permit was not valid was reported at the end of previous years reports and gave only kill estimates.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. When the animal's age/sex is unknown or not reported the kill is listed under the "UNKWN" column. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively. All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

DERIVATION OF LICENSE/PERMIT COUNTS

Accurate computation of the reported estimates of hunters, hunter days, and harvest are dependent on accurate counts of general licenses and special licenses and/or permits sold to resident and nonresident hunters. For license year 1995 analysis, we were unable to document the complete methodology Bill Hoskins used to compile these counts. However, through study of Bill's analysis and reporting routines we arrived at the following procedures, which should produce counts comparable to those of previous years.

In late January and early February, after compiling and sampling the master data file containing all available information on 1995 licenses and permits purchased by resident and nonresident hunters, Bill produced a frequency report which provided counts of general and special licenses/permits sold, both statewide and for each type of special license sold in each hunting district. These counts did not always agree with the final special license quotas, with the special license drawing tallies from Helena, or with the final statewide tallies of general licenses sold. In cases of disagreement, various procedures were used to obtain best estimates of license/permit counts.

Special Licenses and Permits Sold

In most cases, the frequency report based on the 1995 license master file was used to derive the counts of each type of special license sold in each hunting district. If the count of resident and nonresident licenses sold disagreed with the established total quota by more than 3%, and if the special license drawing tally from Helena suggested that all available special licenses were sold, the percents of resident and nonresident numbers from the license master file were applied to the final quota to obtain the reported counts of resident and nonresident special permits sold.

General Licenses Sold

The frequency report based on the 1995 license master file did not include all of the most recent information on licenses sold. Therefore, the 1995 License Sale Report, dated 4/30/95 from the Helena Conservation Licensing System, was used as the most recent souce of these counts. Total general resident elk license counts (GlcR) were derived from the sum of Sportsman, Adult, and Senior/Youth/Disabled licenses sold. Total general nonresident elk license counts (GlcN) were derived from the sum of General Big Game Combo and Outfitter Big Game Combo licenses sold. Total general elk license counts were the sum of resident and nonresident sales counts (GlcT=GlcR+GlcN).

The current analysis methodology requires the most recent tallies of resident and nonresident hunters who purchased a general license, but did not purchase and draw a special permit. The 1995 License Sale Report included a total special elk permit sales count (SpcT), but no counts for resident and nonresident sales. We assumed the SpcT was the most accurate total tally of special licenses sold, and estimated the most recent resident and nonresident sales counts (SpcR & SpcN) using the license master file percentages of total resident and nonresident license/permits sold over all types and districts. The best estimates of resident and nonresident special license sales were then subtracted from the total resident and nonresident general license counts to obtain the required tallies of general license holders without special permits (GlcR-SpcR, GlcN-SpcN). These counts appear in the report under the Number Issued column in the Gen Elk and Gen B10 rows respectively.

ADDENDUM

Bill Hoskins, the computer programmer/analyst for the annual Harvest Surveys analysis and reporting effort since 1985, tragically passed away on March 13, 1996. The 1995 Elk Hunting and Harvest, Time Period of Kill, and Antler Statistics Reports were generated using Bill's routines and procedures to the maximum extent possible. At the time of Bill's death, the hunter sample had already been drawn, the responses had been recorded, and had mostly been keyed into computer files. The hunter regulation "parameter" files, which define the number of special permits issued by district and type, had also been largely entered into a computer database. The only exception was that the breakdown of licenses and permits issued to residents and nonresidents by district and type were not available. This information was compiled using techniques described in the "Derivation of License/Permit Counts" section of this report.

Several quality control steps were taken to insure the validity of the elk statistics. Survey response data were verified at entry. The license/permit parameters were checked against the final hunting regulations. At each run of the analysis and reporting routines, diagnostic summaries were generated which indicated invalid response records and summarized the sampled percent of the license/permits issued by hunting district and type. Those showing oversampling were flagged. Inconsistencies and/or irregularities revealed by these diagnostic reports pointed to errors in either the response or parameter files. The reports were reviewed by research and management biologists before printing.

TIME PERIOD OF KILL

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1995 ELK TIME PERIOD OF KILL REPORT

MAY 21, 1996

PREFACE

1995 ELK TIME PERIOD OF KILL REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

UNKWN...............	A symbol for unknown used to designate unknown time period of kill
GEN ELK.............	An abbreviation for general elk license
GEN B10.............	An abbreviation for nonresident Big Game Combination license type B10
SP..................	An abbreviation for special permit preceding the special permit district/option designation
SPECIAL.............	Used in the regional or state summaries to designate combined special permits
OTHER...............	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.

Explanations

The elk time period of kill statistics are estimates made from the sample of 59,058 questionnaires representing about 43 percent of all 138,374 elk license holders. The total harvest estimate in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the total harvest estimate.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the various unknown categories given in the report. The "UNKWN" time period indicates elk kills with missing time period data. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

(CONTINUED)

PREFACE (Continued)

This report for 1995 represents the fifth year that the time period of kill statistics have been expanded estimates rather than statistics based on the completed questionnaire sample. Reports previous to 1991 listed "SAMPLE NUMBER KILLED" above the right-hand column whereas this report lists "TOTAL HARVEST ESTIMATE".

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1995 ELK ANTLER STATISTICS

MAY 21, 1996

PREFACE

1995 ELK ANTLER STATISTICS

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE...The number of points on each side
FREQUENCY.....The number of occurrences of the given antler type in the given hunting unit within the expanded sample antler data collected
PERCENT.......The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are estimates made from the sample of 59,058 questionnaires representing about 43 percent of all 138,374 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected for antlered elk. Total estimated number killed in each hunting unit is given at the bottom of the frequency column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1995 represents the fifth year that the antler point frequencies have been expanded estimates rather than a frequency count of the collected sample data. This was done primarily to correct the occasional bias explained in the 1990 antler point statistics preface, but the change should also make the results easier to use.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

1995 ELK

Our records show that you were issued a license or permit to hunt elk in Montana in 1995, which is shown on the address label to the left. Please record ALL of your OWN elk rifle and archery hunting activity in Montana during the past 1995 elk hunting season. (Sept. 1, 1995 - Feb. 19, 1996)

1. Did you HUNT Elk in Montana this past season? . . . . NO ☐ 1 YES ☐ 2
   (includes: archery, general and late)

2. Please list the top 4 hunting districts (see map for 3 digit hunting district number) hunted for Elk and the total days hunted in each. . . . .

Hunting District Number	No. Days Hunted

3. Did you KILL an Elk? . . . . NO ☐ 1 YES ☐ 2

4. In which hunting district did you KILL your Elk? . . . . ☐☐☐ Hunting District

5. Elk killed was a: . . . . CALF ☐ 1 COW ☐ 2 BULL ☐ 3

   5a.) If a bull, how many points on each side? . . . . ______ X ______ (Side 1) (Side 2)
   (Points, including brow points are antler tips 1" long or longer. Spike bulls are 1x1)

6. Elk was killed during which time period? . . . . BEFORE OCT. 22 ☐ 1 OCT. 22- 28 (1st Week) ☐ 2
   OCT. 29-NOV. 4 (2nd Week) ☐ 3 NOV.5-11 (3rd W eek) ☐ 4 NOV. 12-18 (4th Week) ☐ 5 NOV. 19-26 (5th Week) ☐ 6 After NOV. 26 ☐ 7

7. Describe specific location of kill (geographic landmark).

   ____

8. If the elk had a collar or tag, please describe.

   ____
